SECTION 1

Project Overview

A multi-page web application suite built for a premium laundry pickup & delivery business. The suite consists of a customer-facing booking app and a complete admin back-office covering dashboard analytics, order management, team management, and QR-code based order tracking.

Key characteristics:

- Built as static HTML / CSS / JavaScript — no frameworks, no build step
- Fully bilingual: Arabic & English with complete right-to-left (RTL) layout support
- AED currency used throughout, matching the UAE market
- Five interconnected pages sharing one consistent green & gold brand identity
- Realistic sample data pre-loaded so every page works out of the box

SECTION 2

Customer App — index.html

The public-facing booking experience customers use to schedule a pickup, choose items, and confirm an order.

Features

- Sticky navigation bar with tap-to-call phone number, WhatsApp button, and language toggle
- Hero section with brand stats — 4.9★ rating, 12,000+ orders completed, 24-hour turnaround
- "Our Process" showcase: Wash & Fold, Iron & Press, Dry Cleaning, Sheets & Linen, Delicates
- Trust bar: Insured, Eco-certified, On-time guarantee, 4.9/5 customer rating
- Services selection grid covering all six core service types
- Collapsible **Clothing** accordion — 19 items (Shirt, Trouser, T-Shirt, Suit, Skirt, Kandoora, Ghatra, Abaya, Shiela, Blouse, Dress Normal/Special, Jacket/Coat, Pullover, Tie, Shalwar Kamiz, Vest, Socks, Underwear)
- Collapsible **Home & Linen** accordion — 7 items (Pillow, Pillow Cover, Quilt, Bath Towel, Comforter Cover, Bed Sheet, Comforter) plus a Shoes Cleaning price-on-request note
- Pickup & delivery forms with selectable time-slot pills, from 7–9 AM through 6–8 PM
- Live order summary with running total that updates instantly as items are selected
- Booking confirmation screen with a step-by-step order timeline and order ID
- Hotels & Hospitality section offering custom contract-rate quotes for hotels and serviced apartments
- Floating WhatsApp button for instant customer support

SECTION 3

Service Price List

Official pricing as displayed to customers in the booking app, matching the in-store price card. All prices in AED. Where two prices are shown separated by a slash, they represent different sizes or piece counts (e.g.

2-piece vs 3-piece suit).

Description	Steam Press (AED)	Wash & Iron / Dry Clean (AED)
Shirt	3	6
Trouser	3	6
T-Shirt	3	6
Suit (2 Pcs)	15	25 / 30

Bath Towel	—	5
Comforter Cover	5	12
Bed Sheet	5	10
Comforter	—	30

Shoes Cleaning — price on request, call +971 58 285 9762.

SECTION 4

Admin Dashboard — admin.html

The operations command center, giving the business owner an at-a-glance view of daily performance.

Features

- Fixed sidebar navigation linking Dashboard, Orders, Team, QR Codes, and the live Customer App
- Four key stat cards: orders today, revenue (AED), pending pickups, delivered orders
- Weekly revenue bar chart spanning Monday through Sunday
- Order status breakdown shown as horizontal progress bars across all order states
- Recent activity feed listing the latest order events as they happen

SECTION 5

Orders Management — orders.html

The full operational view of every order, with powerful filtering and a built-in QR tag generator.

Features

- Date filter bar: Today, Yesterday, This Week, This Month, or a custom date
- Five stat cards: total orders, revenue, pending/active, delivered, and cancelled
- Orders-by-time-slot bar chart showing demand across the six daily pickup windows
- Visual timeline view with each order's pickup area shown directly on its entry
- Area filter chips, automatically generated from order addresses, for one-click location filtering
- Searchable, filterable orders table — by status, time slot, and area — with inline edit, call, and cancel actions
- Per-order **QR tag generator**: a single click produces a printable, luggage-tag style QR code containing the order ID, customer name, item count, total cost, and status — ready to download as a PNG or print directly onto the laundry bag
- Bell notification system that flags any delivery due within two hours, with a live countdown per order and a browser push notification for urgent (under 30 minute) deliveries

SECTION 6

Team Management — team.html

Staff scheduling and performance tracking for drivers, laundry staff, and support roles.

Features

- Four stat cards: total team size, available now, currently on duty, off today
- Team member cards showing avatar, role, live status, shift time, coverage area, and performance ratings
- Role filter tabs to quickly narrow the view to drivers, laundry staff, or other roles
- Add / Edit member modal for onboarding new staff or updating existing profiles
- Today's schedule panel, grouped by shift

- Active assignments panel showing which team member is handling which order in real time

SECTION 7

QR Code Scanning — qrcode.html

A dedicated lookup station for staff to scan a bag's QR tag — generated from the Orders page — and instantly retrieve everything about that order.

Features

- Camera-based QR scanning using the device's built-in camera
- Manual code entry as a fallback — type the order ID or paste the QR text directly
- Full order detail display on scan: customer name, phone, location, piece count, total cost, payment method, and current status

SECTION 8

Technical Details

Stack	Vanilla HTML, CSS & JavaScript — no frameworks, no build step
Icon library	Tabler Icons, served via cdn.jsdelivr.net
QR libraries	qrcodejs (generation) and html5-qrcode (camera scanning)
Local hosting	Python http.server, running on localhost:5500
Deployment target	DigitalOcean App Platform — deployable as a Static Site component
Repository	github.com/ahmedabuseif1997/ecolaundry
Pages	index.html · admin.html · orders.html · team.html · qrcode.html
